## DETAILED ACTION

### *Claim Objections*

1. Claims 23 and 33 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 23 and 33 are not been further treated on the merits.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-3, 9, 10, and 38-42 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21-30 of copending Application No. 10/812,884. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are broader in scope than the claims of the '884 application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

5. Claims 41 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Vo-Dinh et al. (US 6,212,421 B1 of record).

Vo-Dinh teaches in col. 5, lines 3-55 a subject-information imaging apparatus which irradiates a subject to be examined with light (using light source 210) and an ultrasonic wave (using ultrasound transducer 220) comprising a photo-acoustic receiver (218) which inherently receives acoustic waves generated in the subject by the light and ultrasonic wave, converts the waves into electrical signals, generates a plurality of image data on the basis of the electrical signals, and displays the respective image data (132, 134).

***Allowable Subject Matter***

6. Claims 4-8, 11-22, 24-32, and 34-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
